Strengthen Client Retention & Producer Effectiveness

Problem Statement: Overcoming Siloed Multi-Source Data & Safeguarding the 90% Retention Revenue Base

CRITICAL BUSINESS REALITY: 90% OF REVENUE DEPENDS ON CLIENT RETENTION

In commercial insurance brokerage, **over 90% of annual revenue and enterprise valuation depends directly on retaining existing clients**, while new customer acquisition accounts for only 10%. Despite this immense dependency, brokers operate with severely fragmented tools without a single consolidated view, jeopardizing millions in annual renewal premium.

DATA ARCHITECTURE

Siloed Multi-Source Data

Non-Availability of Single Consolidated View

- **Disparate Legacy Systems:** In-force policies reside in Policy Admin (PolicyCenter), account notes & interactions in Salesforce CRM, claims in Claims desks, and invoices in ERP/billing.
- **No Consolidated Client Truth:** Operational records remain trapped in isolation with inconsistent identifiers and contradictory fields.
- **No Unified Timeline:** Absence of a unified chronological history across claims, billing, endorsements, and customer meetings.

PRODUCER FRICTION

Severe Time Drain & Fatigue

40%+ Producer Hours Lost to Data Hunting

- **Tedious Manual Cross-Referencing:** Commercial producers spend 40%+ of their working week logging into 4+ disparate systems before renewal meetings.
- **Cognitive Overload & Burnout:** Manually stitching together policies, billing records, and open claims drains valuable producer sales capacity.
- **Superficial Renewal Preparation:** Time constraints lead to rushed, administrative renewal check-ins rather than strategic risk advisory conversations.

REVENUE EXPOSURE

Dangerous Blind Spots

Silent Churn Across the 90% Core Book

- **Conflicting Renewal Dates:** Unsynchronized expiration dates between CRM and Policy Admin cause missed statutory renewal windows.
- **Open Claim Surprises:** High-severity claims filed near renewal (≤60 days) blindside producers walking into executive meetings.
- **Avoidable Account Defection:** Overdue client commitments and unresolved billing disputes trigger silent client churn to competing brokers.

CONFIDENTIAL • FOR INTERNAL STRATEGIC ALIGNMENT

Strengthen Client Retention & Producer Effectiveness

Solution Approach: Grounded Intelligence, Deterministic Rules & Unified Data Architecture

01

RELATIONAL FOUNDATION

Unified Client Data Hub

Single Truth (SQLite/Postgres)

- **10+ Relational Domains:** Unifies accounts, policies, claims, billing invoices, cases, documents, contacts, and endorsements in an ACID store.
- **Consolidated Single View:** Direct elimination of multi-system data silos with synchronized relational linking.
- **Chronological Activity Timeline:** Single stream of all client touchpoints, notes, and milestones.

02

DETERMINISTIC LOGIC

Automated Rules Engine

10 Business Rules (R1–R10)

- **Conflict Reconciliation:** Detects and flags date contradictions between CRM and Policy Admin systems.
- **Dynamic Risk Tiering:** Mathematically computes account risk (High/Med/Low) from 60-day open claims, stale policies, & overdue invoices.
- **Evidence Confidence Scoring:** Mathematical scores weighted by multi-system corroborated evidence.

03

ENTERPRISE AI

Grounded AI Intelligence

Resilient Multi-Model Pipeline

- **Dual-Model Strategy:** Primary Gemini 2.5 Flash Lite + GPT-4o fallback gateway for high-throughput, low-latency synthesis.
- **Deterministic Offline Fallback:** Zero-downtime operation ensuring complete briefs even if cloud gateways fail.
- **Claims Completeness Guard:** Verifies 100% of open claims are cited and discussed before delivering meeting briefs.

04

MODERN EXPERIENCE

Role-Tailored Cockpits

React 19 + TanStack Query

- **Producer Cockpit:** Risk-ranked books of business, 1-click printable briefs, facts vs. hypotheses, and citation drawers.
- **Regional Leader Cockpit:** Macro portfolio exposure, 30/60/90-day renewal timeline, and producer capacity tracking.
- **Enterprise Governance:** PBKDF2 authentication, row-level access control, and full token/cost audit logs.

Strengthen Client Retention & Producer Effectiveness

Benefits & Impact: Protecting the 90% Revenue Core, Slashes Prep Time & Empowering Producers

90%
Revenue Base Secured
Direct protection of core renewal business

85%
Faster Meeting Prep
From 2-3 hours down to < 5 minutes

100%
Claim Completeness
Zero surprises or omitted active claims

< 3.0s
Synthesis Latency
Instant Gemini 2.5 & GPT-4o grounded brief

OPERATIONAL EXCELLENCE

Producer Effectiveness

Reclaiming Sales & Advisory Capacity

- **Slashes Administrative Drain:** Frees producers from 40%+ tedious cross-system data hunting, refocusing time on active client relationship management.
- **Executive-Ready Preparation:** Automatically compiles 1-page printable meeting briefs complete with account snapshots, agendas, and verified citations.
- **Strategic Advisory Mindset:** Replaces reactive policy transactional check-ins with proactive coverage analysis and risk mitigation proposals.

REVENUE PROTECTION

Client Retention Maximization

Safeguarding the 90% Revenue Stream

- **Guards Critical 90% Revenue Base:** Eliminates silent account defections caused by unaddressed claims, billing disputes, or overdue commitments.
- **Eliminates Blind Spots:** Proactively reconciles contradictory renewal dates across systems before statutory deadlines elapse.
- **Regional Portfolio Visibility:** Empowers regional leaders with real-time exposure heatmaps, premium-at-risk tracking, and 30/60/90-day pipelines.

ENTERPRISE TRUST

Governance & Responsible AI

Deterministic Safety & Compliance

- **Zero Hallucinations:** Guarded architecture strictly requires citations resolving to verified source policy, claim, and billing database IDs.
- **Zero-Trust Row-Level Security:** Strict server-side RBAC ensures producers access only permitted accounts and leaders see regional scopes.
- **Full Auditability & Tokenomics:** Granular tracking of LLM model selection, token counts, generation cost, latency, and user audit trails.
